### About the Conference

The developing countries usually have a limited national wealth. However, they need to spend this wealth to import goods and services. Also, to trade with other countries, they need foreign exchange. Entrepreneurship helps in conserving the outflow of the national wealth in the following ways. As entrepreneurship is a low-cost strategy of economic development, job creation and technical innovation. Thus they enable the production locally and reduce the need of import. Entrepreneurs also bear the costs and risk of launching a new venture, developing a new product, commercializing an invention, adopting a technology and enveloping a new market. They will even help in generation of foreign exchange, thus conserving the outflow of national wealth.

Make in India is an initiative of the Government of India to encourage multi-national, as well as domestic, companies to manufacture their products in India. The major objective behind the initiative is to focus on job creation and skill enhancement in 25 sectors of the economy. The initiative also aims at high quality standards and minimizing the impact on the environment. The initiative hopes to attract capital and technological investment in India.
